SocietySync

Complete Project Report & User Manual

Track. Connect. Protect. Repeat.

Prepared by Aman Mahadik & SocietySync Contributors

8 July 2026

Part 1 — Document Design & Styling Theme

This section defines the visual identity used consistently across the SocietySync mobile app, admin web portal, and this report, so that all touchpoints feel like one product.

Palette & Visual Identity

Element	HEX Code	Usage
Primary Background	**#09090b**	Dark slate — pages, covers, structural headers
Card / Panel Background	**#18181b**	Zinc grey — content sections and callouts
Accent / Mint	**#00d4aa**	Vibrant teal — positive actions, badges, primary links
Alert / Red	**#ff3b30**	Red — rejections, delete buttons, critical notices
Text Primary	**#fafafa**	Near white — titles and primary body copy
Text Secondary	**#a1a1aa**	Muted grey — sub-headers and secondary notes

Typography Guidelines

- Titles & Headers: Cabinet Grotesk or Outfit — geometric, modern sans-serif
- Body Text: Inter or Helvetica Neue — sleek, highly readable

Part 2 — Project Overview & Architecture

SocietySync is a modern, double-sided smart gate and society management system designed to streamline resident onboarding, visitor security, and administrative operations.

Technical Stack

Layer	Technology
Core Web Portal	Next.js (React 19), custom dark theme styling
Mobile Application	React Native / Expo
Backend & Database	Supabase (PostgreSQL) with Realtime subscriptions for security logs
Location Validation	Interactive Leaflet + OpenStreetMap
RTO Registry Lookup	LookupForge API — auto-generates unique RTO-based society codes

Part 3 — Core Features & Capabilities

1. Unique RTO Society Code Engine

Every registered society receives an auto-generated, RTO-based unique identification code, patterned similarly to vehicle registration plates (e.g. SS-MH-12-AA-0001):

- SS — Platform prefix (SocietySync)
- MH — State code (e.g. Maharashtra)
- 12 — RTO registry area code (e.g. 12 for Pune, 14 for Pimpri-Chinchwad)
- AA — Alpha series sequence (increments from AA to ZZ)
- 0001 — Serial index (increments from 0001 to 9999)

2. Premium VIP Number Plates (Revenue Generation)

A built-in monetization model allows societies to purchase premium custom codes (like SS-MH-12-VIP-0001 or SS-MH-12-AA-7777). Admins can manually input and check availability of premium custom codes during registration approval.

3. Smart Interactive Map Location Picker

Ensures accuracy of address registrations by embedding Leaflet Maps on both the registration page and the Master Review dashboard. Coordinates (latitude & longitude) are pinned and saved to the database.

4. Verification Checklists & Automated Email Dispatch

- Four-step verification auditing: name check, address validation, certificate authenticity, and admin credentials
- SMTP Gmail system dispatches stylized HTML emails in real time from societysync5@gmail.com, notifying applicants of approvals (with credentials/next steps) or rejections (with a custom reason)

Part 4 — System Workflows

1. Registration & Approval Workflow

1. A Society Representative registers the society and uploads verification documents.
2. The registration is stored with a pending_verification status and the Master Admin is notified.
3. The Master Admin audits the documents and the pinned map location.
4. On approval, the society is marked Active and a unique society code is generated.
5. On rejection, the request is marked Rejected and the applicant is notified with a reason.

2. Resident Onboarding Workflow

1. Resident downloads the SocietySync mobile app.
2. Resident enters the society's unique code (e.g. SS-MH-12-VIP-0001).
3. Resident inputs their flat number, wing, contact info, and vehicle registry details.
4. The profile is marked as Pending Approval.
5. The Society Admin logs into the portal, reviews the roster, and clicks Approve.
6. The resident's mobile dashboard is unlocked.

Part 5 — User Manual (How to Use)

For Applicants — Registering a Society

1. Navigate to the portal registration page.
2. Step 1 (Details): Fill in society name, admin (secretary) name, email, phone, and password.
3. Step 2 (Location): Type in your address. In the City (RTO Registry City) field, enter your RTO city (e.g. Pune or Pimpri-Chinchwad). Click Locate Address on Map or drag the interactive marker to pin your entrance.
4. Step 3 (Admin / Cert): Upload your official Housing Registration Certificate as a PDF or image.
5. Step 4 (Review): Verify the entered details and click Submit Request.

For Master Admin — Reviewing & Approving

1. Log in to the Master Admin portal.
2. Go to Pending Requests and click Review on a request.
3. Check the location pin on the interactive Leaflet map and review the uploaded PDF.
4. Complete the Verification Audit Checklist in the right sidebar.
5. (Optional monetization) If the society purchased a custom plate, enter it in the VIP Code Override field.
6. Click APPROVE REGISTRATION (creates the account and emails credentials) or REJECT REGISTRATION (with a reason).

For Society Admins — Managing the Roster

1. Retrieve your login credentials from the approval email sent by societysync5@gmail.com.
2. Log in to the Admin Dashboard.
3. Use the Roster tab to view pending resident registration requests, approve new residents, and manage security guard credentials.

Appendix — Download the App

Scan the QR code below with your phone's camera to download and install the SocietySync mobile app.

Scan to download SocietySync

Next Steps After Installing

1. Open the app and tap Sign Up on the welcome screen.
2. Enter your society's unique code (shared by your Society Admin, e.g. SS-MH-12-VIP-0001).
3. Fill in your flat number, wing, contact details, and vehicle registration (if applicable).
4. Submit your profile — it will show as Pending Approval.
5. Once your Society Admin approves your profile, your dashboard unlocks automatically.
6. Explore the Home, Parking, Chat, and Profile tabs, and set up the Emergency SOS Shield for quick access.
